Benefits of Panasonic Chair Massage

- Relaxes muscles
- Stimulates acupoints for increased energy flow
- Temporarily increases circulation

Advanced Quad-Style Massage Technology

Massage heads that open and close – these 4 massage styles can be chosen during a massage:

- **Shiatsu** – finger pressure massage using thumb pressure to press, hold and release for strong deep-tissue pressure and stretching using 2 massage heads.
- **Swedish** – variety of massage techniques designed to relax and invigorate muscles.
- **Kneading** – push & grasp for a deep maximum therapeutic effect, that stimulates acupoints and increases energy flow. Particularly useful for the neck and shoulders.
- **Grasping** – thumb and finger closing kneading massage.

A Panasonic Exclusive!

The "Junetsu" Massage Technique

Junetsu, the Japanese word for 'ultra fine kneading' is based on the one-second circulator thumb movements of professional massage therapists. Junetsu quickly loosens up tight muscles, and the spiral circular motion reverberates through muscles to invigorate down to your bones' surface.

"Junetsu" Ultra-Fine kneading Penetrates Deeply and Quickly

Panasonic Real Pro ULTRA™

— the latest luxury massage chair from the leaders in massage replication technology for over 35 years – Panasonic. The **Panasonic Real Pro Ultra™** is designed to help you achieve therapeutic muscle relaxation and increased blood flow throughout your body to promote good health, with its 5 pre-set programs, a 5-minute Quick 'Refresher' mode and 8 customizable self-program modes. The **Panasonic Real Pro** is truly like having your very own massage therapist at home.

Increase Circulation, Relieve Tension and Increase Energy

The Technology

Acupoints

You have approximately 350 acupoints in your body, with nearly 100 in your back and neck. From the soothing palm style of Swedish massage, to deep tissue kneading, to Shiatsu massage, the Real Pro ULTRA™ massage lounger has a variety of techniques to target acupoints, resulting in invigorating energy.

Body Scan Technology

Using pressure sensor technology, the Real Pro Ultra™ creates a virtual map of your back. (200 sq. in.) The Real Pro Ultra scans your body then delivers a massage contoured to your spine's curves. The 'floating' massage heads glide over your back – Ultra knows where to massage, and where not to. You create your own customizable program, which Ultra remembers for the next time you're ready for a massage.

460 Square Inches of Air Massage

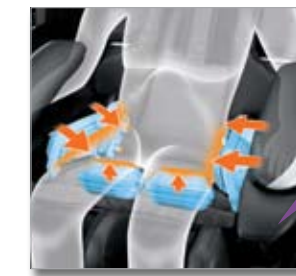

Get the most luxurious massage from the industry's latest technology

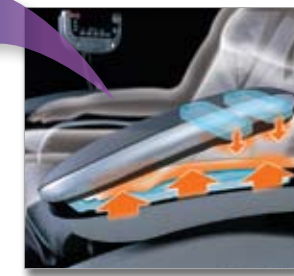

Shoulder Massage
Gently stimulates your lymphatic system to help cleanse the body.

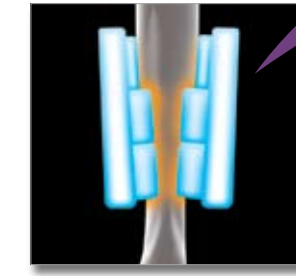

Arm & Shoulder Stretch
Gradual stretching of shoulder muscles to remove tension & increase flexibility.

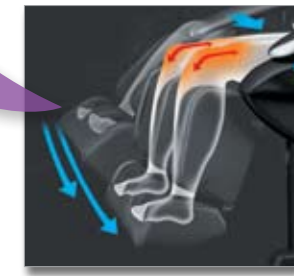

Seat and Hip Massage
Gently squeezes and soothes buttocks, outer thighs and waist. Soft adjustable hip acupoint nodule.

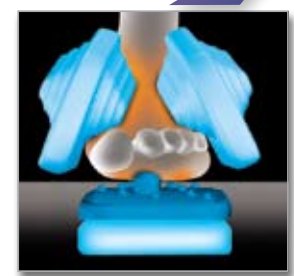

Arm & Palm Massage
Increase circulation and warmth, removes tension.

Calf Massage
Gently squeezes and loosens tightness, increases circulation.

Leg Stretch
Works to alleviate stiffness in your lower back, hips and thighs. The air system in the ottoman squeezes the lower legs while it lowers and raises in 20° increments.

Reflexology

For professional, personalized massage therapy on your feet, the Real Pro Ultra™ utilizes adjustable and removable plates to incorporate reflexology into the massage experience. This reflexology stimulates additional massage points on your feet, increasing blood and energy flow throughout your body.
